

Module 4.1: Summary of discharges from the obstetric ward – one month prospective survey

No.		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	total
	BHT																					
A	Outcome of admission																					
1	Live discharge – (mother)																					
2	Transfer to other institution																					
3	Death																					
4	Needed critical care (ICU)																					
5	Transferred to Medical / Surgical unit in the same institution																					
B	Reasons for admission																					
1	Admitted for delivery																					
2	Investigation of IUGR																					
3	Decrease fetal movements																					
4	Admitted for investigations (Blood, Ultrasound, etc.,)																					
5	Febrile illness																					
6	Other illnesses																					
7	Admitted for other complications of pregnancy																					
8	Other																					
C	Mode of Delivery																					
1	Vaginal delivery																					
1.1	Cephalic																					
1.2	Breech																					
2	Vacuum extraction																					

No.		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	total
3	Forceps extraction (cephalic)																					
4.1	Cesarean deliveries (<i>elective</i>)																					
4.2	Cesarean deliveries (<i>emergency</i>)																					
D	Information on labor																					
1	Labor spontaneous																					
2	Labor induced																					
3	If induced																					
3.1	Syntocinon																					
3.2	Prostaglandin																					
3.3	Synto + Prostaglandin																					
3.4	Other																					
E	Complications of labor																					
1	Prolonged / Obstructed labor																					
2	Lack of progress																					
3	Retained placenta																					
4	Tears																					
5	Cord prolapse																					
6	Shoulder dystocia																					
7	Other																					
Obstetric Complications																						
F	Haemorrhage																					
1	Placenta previa																					
2	Accreta/increta/percreta placenta																					
3	Abruptio placenta																					
4	Ruptured uterus																					
5	Postpartum hemorrhage																					
6	Other obstetric hemorrhage																					

No.		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	total
G	Infection																					
1	Abortion related infection																					
2	Post Partum sepsis																					
3	Pyelonephritis																					
4	Influenza-like illness (viral fevers)																					
5	Other systemic infections/sepsis																					
H	Hypertension																					
1	Chronic hypertension (Diagnosed before preg.)																					
2	PIH other than eclampsia																					
3	Eclampsia																					
I	Co- morbidities																					
1	Severe Anemia																					
2	TB																					
3	Malaria																					
4	Dengue																					
5	H1N1																					
6	Cancers / Malignancies																					
7	Heart disease																					
8	Lung disease																					
9	Renal disease																					
10	Hepatic disease																					
11	Gestational diabetes																					
12	Diabetes prior to pregnancy																					
13	Impaired Glucose Tolerance																					
14	HIV / AIDS																					
15	Other STD																					
16	Gender Based violence																					

No.		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	total
17	Attempted suicide																					
18	Behavioral / Psychiatric abnormalities in pregnancy																					
J	Pregnancy Outcome																					
1	Singleton birth																					
2	Twins																					
3	Triplets / more																					
K	Fetal outcome																					
1	Live birth – healthy normal																					
2	LB – Asphyxiated recovered																					
3	LB – Asphyxiated needing special care																					
4	Still birth – fresh																					
5	Still birth – macerated																					
6	Birth weight (Kg)																					
7	Neonatal sepsis																					
8	Death before discharge																					
9	Transferred to NICU / SCBU																					
10	Transferred to another institution																					
11	Other
