

Section 5

Postnatal Care – Office Supervision

1. Name of the supervising officer :
2. Designation of the supervising officer :
3. Date of supervision :
4. MOH area :
5. PHM area :
6. Name of the PHM :
7. Objective of the supervision:
8. Was the PHM informed regarding the supervision Yes/No
9. Is the PHM in complete uniform? Yes/No
10. Issues identified in the eRHMIS data related to postnatal care –
.....
.....
.....
.....
.....

Data on previous supervision on postnatal care:

- Date of supervision :
- Designation of the supervising officer :
- Recommendations are implemented : Yes/No
- Note on recommendations that were not implemented:
.....
.....

1. Vital statistics

- District birth rate :
- Estimated births for PHM area :
- No. of postnatal mothers under care :

2. Comparison of records and registers on delivery reporting and postpartum care, including morbidity reporting (within a specified time period)

Quarter or Month:

	Diary	Daily statement H523	Monthly statement H524	Eligible family register	Pregnant mothers register	EDD Register	H 512B	BI Register
No. of postnatal mothers under care								
No. of births registered								
No. Received home visits during first 10 days								
No. of mothers reported with postnatal morbidities								

3. Postnatal Care Coverage

Assessment of postpartum care of permanently residing mothers during last quarter. (according to Pregnancy records)

No	Indicator	No.	%
1	No. of mothers who had 1 postpartum visit first 5 days (From all mothers delivered in the last quarter)		
2	No. of mothers who had a postpartum visit first 10 days (From all mothers delivered in the last quarter)		
3	No. of mothers who had 2 postpartum visit first 10 days (From all mothers delivered in the last quarter)		
4	No. of mothers who had 1 postpartum visit within 14 to 21 days (From all mothers delivered in the last quarter)		
5	No. of mothers who had 1 postpartum visit around 42 days (From all mothers delivered in the last quarter& completed 42 days)		

No	Indicator	No.	%
6	No. of mothers received Vitamin A mega dose (From reported births) From the hospital or from the PHM		
7	No. of neonates who received breast milk within 1 hour of birth according to CHDR B portion		
8	No. of mothers with post-natal complications (From randomly selected cards of mothers who completed 42 days postpartum [No of Cards])		

4. Postpartum care received by mothers who came from outside during last quarter

Indicator	No.	%
Outside mothers delivered during last quarter		
Received 1 home visit within 1st 10 days		
Received 2 home visits within 1st 10 days		
Received home visit within 14 – 21st day		
Received home visit around 42 days		

5. Postpartum care by mothers delivered at home during last 4 quarters

Home deliveries	No.	No. received - 3 home visits within 1st to days	No. received - home visit between 14 – 21th day	No. received -home visits around 42 days
Trained				
Untrained				

6. Interventions carried out at PHM level for following postpartum morbidities

Morbidity reported	No. reported during last year	Intervention/action taken
Breast Problems		
Postpartum depression		
Infected episiotomy		
Any other common morbidity (specify)		

7. Care for GBV survivors among postpartum mothers during last quarter

	No.	Comment
Total number identified as new survivors of GBV among postpartum mothers		
Number of survivors received emotional support for the first time among postpartum mothers		
Number of referred survivors among postpartum mothers
