

Section 6

Infant, Child and Adolescent Care – Office Supervision

1. Name of the supervising officer:
2. Designation of the supervising officer:
3. Date of supervision :
4. MOH area :
5. PHM area :
6. Name of the PHM :
7. Objective of the supervision:
8. Was the PHM informed regarding the supervision Yes/No
9. Is the PHM in complete uniform? Yes/No
10. Issues identified in the eRHMIS data related to child and adolescent care –
.....
.....
.....
.....
.....
.....

PHM area statistics

- i. District Birth Rate :
- ii Estimated births for PHM area :

Data on Previous supervision on Infant, Child and Adolescent Care :

- Date of supervision :
- Designation of the supervising officer :
- Recommendations are implemented : Yes/No
- Note on recommendations that were not implemented:
.....
.....

Part - 1

Infant and Child Care

1. Care for infants during last quarter

Compare the consistency of data using different records in a selected quarter

Quarter :

No	Activity	No. in H 524	No. in H 523	No. in Diary	No. in CHDR B portions	No. in H512 B	According to BI register
1	Birth reporting						
2	No of infants under care						
3	Post-partum first visits during 1st 10 days after delivery						
4	Infants registered						
5	Infants received home visit after 42 days						
6	Low birth weight reported						

2. Consistency of data on children under care

Age group	Estimated	No. in H 524	No. of CHDR B	No. in BI register	No. in growth monitoring register
Infants					
1 – 2years					
2 – 5 years					
Total					

3. Consistency of data on child care: cross-check few entries in different records

No		Yes	No	Comments
1	B portions are separated according to villages and year of birth (and easily traceable)			
2	No. of children in 1 -2 and 2 – 5 age groups in the BI register tallies with the monthly report			
3	No. of weighing in the B portion and GMP register and daily statement tally with each other?			
4	No. of length/height measurements in the B portion and GMP register and daily statement tally with each other?			
5	Home visits made for preschool children as written in the diary tallies with that in the daily statement.			
6	Registration dates of the BI register, CHDR B portions and diary tallies with each other.			

4. Immunization coverage

No	Vaccine	No. to be immunized (for estimated births)	No. Immunized (B1 register)	%	% of age-appropriate Immunization	Others
1	BCG					
2	PENTAVALENT 1					
3	JE					
4	MMR 1st dose					
5	MMR 2nd dose					
6	DT & OPV (5th dose)					

For vaccines 1 to 4 the denominator should be No of children completed 1 year under care. For MMR II It should be the number of children completed 3 years and for DT children completed 5 years under care, respectively.

AEFI reporting during last quarter for number of total immunizations carried out during quarter.

No. Percentage (%)

5. Adequacy of child weighing centers

- i. No. of infants under care :
- ii. No. of 1 – 2 years under care :
- iii. No. of 2 - 5 years under care :
- iv. No. of field weighing posts :
- v. No. of field weighing posts : Adequate / Not adequate/ More than required
- vi. Annual schedule for field weighing posts is available with dates: Yes / No
- iv. Spread of field weighing posts in the map and assess accessibility:
Satisfactory / Not satisfactory

6. Nutritional status of under 5 years children

a) Take the information using growth monitoring register

Measuring weight					
Infants (last month)		Children 1 -2 (last month)		Children 2 – 5 yrs (last quarter)	
No. to be measured	No. measured	No. to be measured	No. measured	No. to be measured	No. measured

Measuring length					
Infants (last month)		Children 1 -2 (last month)		Children 2 – 5 yrs (last quarter)	
No. to be measured	No. measured	No. to be measured	No. measured	No. to be measured	No. measured

b) status of weighing of < 5 year children

(use a sample of 10 children from each category using growth monitoring register or CHDR B portions):

		No.	%
Children completed one year	Weighed once a month regularly		
	Weighed at least 9 times		
Children completed 2 years	Weight once a month regularly during age 1 – 2 yrs		
	Weighed at least 9 times during age 1 - 2		
Children completed 5 years	No. weighed once in three months regularly during age 2 – 5 yrs		
	No. weighed more frequently than once in 3 months during age 2 -5 yrs		

c) Status of length/ height measuring of < 5 year children

(use a sample of 10 children from each category using growth monitoring register or CHDR B portions):

Age category	Norm	No.	%
Children completed 2 years	Length measured at least 4 times (4, 9, 12 and 18 months)		
Children completed 5 years	Height measured once in six months regularly during age 2 – 5 yrs		
	Height measured more frequently than once in 6 months during age 2 - 5 yrs		

d) Nutritional status of < 5 year children during the last month according to H – 524

	No under care	No. Weighed	Moderate Under weight < - 2.SD to -3 SD		Severe underweight < - 3 SD		Normal weight +2SD to -2SD		“Overweight” >+2SD	
			No.	%	No.	%	No.	%	No.	%
Infants										
Children 1 -2 years										
Children 2 -5 years										
Total										

e) Nutritional status of < 5 year children during the last month according to growth monitoring register

	No. under care	No. Weighed	Moderate Under weight < - 2.SD to -3 SD		Severe underweight < - 3 SD		Normal weight +2SD to -2SD		“Overweight” >+2SD	
			No	%	No	%	No	%	No	%
Infants										
Children 1 -2 years										
Children 2 -5 years										
Total										

Maintenance of growth monitoring register:

Maintained according to instructions given :Yes / No

Analysis of growth monitoring promotion register data

GF by age category :Yes / No

Any growth problem by age category :Yes / No

Trend of GF :Yes / No

No. of SAM children :Yes / No

Nutrition month data sheets –

Data sheets and summary sheets maintained by year :Yes / No

7. Breastfeeding and complementary feeding

(Use randomly selected 10 – 20 CHDR B portions of infants completed 6 months)

		No.	%	Comments
1	Infants who were initiated on breast feeding within 1 hour of birth			
2	Infants who were exclusively breastfed for the first 6 months			
3	Infants started on complementary feeding at the completion of 6 months			

8. Assessment of psycho-social development

(Check 20 CHDR B portions to cover all age groups – infants, 1 -2 years and 2 -5 years)

		No.	%	Comments
1	Developmental stages are marked accordingly to the B Portion			
2	Children prone to home accidents/ Risk factors are identified			
3	Children with special needs are identified			
4	Extra home visits done for the Children who require special attention			

Part - 2

Care for Adolescents

1. Registration and followup

	Yes	No.	Comments
Percentage of adolescents under care (Out of estimate) (Registered in the eligible family register)*			
Adolescents who are not in the eligible families are registered in the last pages in the eligible family register.			
Follow up and monitor children till the age of 18 years by maintaining birth and immunization register			
Maintain a separate register (Book) for adolescents care			

2. Register on consistency of data on adolescents under care

Compare the consistency of data using different records in a selected quarter

Quarter :

No	Activity	No. in H524	No. in H523	No. in Diary	According to eligible family Register
1	No. of adolescents under care				
2	No. of adolescents registered				
3	No. of home visits for adolescents				
4	No. of problems identified (New)				
5	No. intervene by PHM				
6	No. refer to the MOH
